

Dear FCC,

I have heard about your thinking about making KLOVE (91.1) an LPFM broadcaster. I have found KLOVE as an uplifting and encouraging place to listen too. Also I like the way they do their news and the music they play. It helps me when I am driving or when I listen at home. It keeps me upbeat and calm especially when I am driving in Denver. I do believe that the denver area needs KLOVE to stay on the air and to give people a postive station to listen to that does not say mean things or promote violence. This station has had a postive effect on others. I have also used it when I am driving to North Dakota. It is a stressful drive and this station helps to make the way calming and peacefully. It would be a great disservice for this station to be replaced by an LPFM. There would be no where I can turn to where I can listen to and enjoy the music but listen to station that is postive and encouraging. Thank you for listening.
